Identity Theft **911**®

SECURITY BREACH SERVICES™ from Identity Theft 911 deliver a multi-faceted solution for an information security breach incident that exposes any Personally Identifiable Information ("PII") of your organization's customers and/or employees.

Designed by the nation's leader in identity management and fraud education, **SECURITY BREACH SERVICES™** offer a comprehensive solution that enhances any Incident Response Plan—ready to be mobilized at a moment's notice. To get started simply follow these three steps:

Step 1 — Preparedness

Download your Instructional Guide as well as any other support documents that will help to prepare your organization to handle a potential breach.

Step 2 — Continued Awareness

Regularly review your applicable regulatory requirements, so that your organization will be able to respond in a timely and appropriate manner. Identity Theft 911 provides updated quarterly regulatory summaries, including the various state notification requirements.

In addition, you'll get in-depth articles, white papers, newsletters and other relevant resources to help provide your organization's leadership with a continued awareness of the ever evolving world of identity theft and protecting personal information. Identity Theft 911 recommends that you familiarize yourself with the regulatory requirements that govern your organization's response to a breach.

Step 3 — Breach Response

Contact Identity Theft 911's Security Response Team immediately should you suspect a breach of PII may have occurred, whether through mistaken mailing, lost laptop, or other event. We will provide immediate assistance with drafting your notification, setting up a dedicated toll-free number and, in cases of larger breaches, hosting a dedicated website to offer additional assistance to those affected.

Identity Theft 911's Security Response Team will also provide guidance on other aspects of an information security breach such as public relations and notification to the credit bureaus should your situation require such action.

Optional Monitoring Products

Should your organization wish to make proactive monitoring products available to those affected by your breach, Identity Theft 911 can deliver these products at discounted pricing.
